

Brachistocrone a rotaia nei tre spaziotempi ($-u \cdot W = \hat{E}$)

FLRW (de Sitter): rette comoventi,
congelamento a $a = \hat{E}$

Vaidya: rimbalzo τ , stesso arrivo
($E = 1.2, J = 1.3$): il timing conta

Thakurta-Kerr ($A = 1$): τ speculare,
 η spirala (dragging + auto-sintonizzazione)
